INDEX for A Mind for Language (all chapters)

Entries provided with asterisk (*) are important for the Final. For important terms for other earlier material (for exam 1 and exam 2) see previous index files.

A priori knowledge, 4
Absolute universals, 85
Acquire/acquisition, 6, 10
Acquisition of meaning, 157
Adaptive value, 51, 65
Adjustment operations, 75
Affix, 73
African-American English, 186
Agent-based modeling of language origin, 326
*Alarm calls, 250
Algorithm, 35
Algorithmic Level, 35
Allomorph, 75
Al-Sayyid Bedouin Sign Language (ASBSL), 213
American Dream, 7
Analogy, 52, 134
Analytic universals, 87
Ancestor language, 179
Animal models, 280
*Ape projects, 263
Aphasia, 203
Arbitrary, 72
Arbitrary form, 199
*Archaeological record, 278
Archaeology, 269
Architectural analysis, 35
Artifacts, 278
Artificial Intelligence (AI), 28
*Auditory communication, 247
Autopsy Studies, 242
Auxiliary language, 183
Babbling, 148
Baby Talk Register, 136
Baldwin Effect, 99, 324
Basic concepts, 72
Bee dance, 252
Behavior genetics, 222
Behavior Genetics, 66
Behavioral Level, 37
Behaviorism, 8, 23, 31, 61
Binary categorization, 145
Biolinguistics, 332
Biological anthropology, 269
Black English, 186
Blank slate, 16
Bleaching, 322
Bootstrapping, 159
Bootstrapping problem, 159
Borrowing, 181
Bound morpheme, 73
Brain Disorders, 240
Brain localization of language, 219
Brain size, 277
Bricolage languages, 181
Broca’s aphasia, 242
Broca’s area, 235, 242
Capacity for language, 6
Cartesian interactionism, 23
Categorial constraints, 74
Categorical perception, 145
Category Assumption, 157
*Center-embedding, 266
Central nervous system (CNS), 24
Central Nervous System (CNS), 233
Central processor, 51
Cerebral cortex, 233
Child language, 317
Circuits, 25
Classical Architecture, 41
Closed classes, 76
Cochlear implant, 201
Code switching, 181
Cognitive archaeology, 278
Cognitive assumption, 101
Cognitive Assumption, 53
Cognitive linguistics, 97
Cognitive psychology, 62
Cognitive representation, 30
Cognitive representations, 31
Cognitive Science (CS), 12, 28
Cognitive Science Paradox, 40
Communication, 248
Communicative intent, 80
Comparative method, 302
Compeence, 39
Competence/performance distinction, 94
Completeness, 133
Complex words, 73
Complexity, 86
Compound, 73
Comprehension, 143
Computational Level, 33, 35
Computational reflexes, 48
Computer Science, 32
*Conceptual memory, 285
*Conceptual worlds, 287
Conceptualism, 105
Connectionism, 42
Connections, 42
Consciousness, 289
Consciousness, 25
Constraints, 72
Constructivist view, 52
Cooing, 147
Coreference, 129
Corpus callosum, 234
Creationism, 1, 327
Creativity, 52
Creole languages, 179, 181, 185, 333
*Critical period effects, 58, 163, 170, 255, 333
Cross-sectional studies, 142
Cryptology, 33
Cue, 114
Cultural anthropology, 269
*Cultural Big Bang, 279
Cultural identity, 191
Cybernetics, 30
Daughter languages, 179, 301
Deaf (cultural identity), 191
Deaf (physical condition), 191
Deep universals, 87
Delayed acquisition, 208
Dendrites, 25
Dependency, 114
Derivation, 73
Developmental epistemology, 52
Developmental Evolutionary Psychology, 66
Developmental problem of language acquisition, 107, 128
Diary studies, 142
Dichotic listening studies, 238
Displacement, 261
Dissociation, 224, 333
Dolphins, 265
Domain delimitation, 248
Domain-specificity, 49
Down syndrome, 164
Dual patterning of language, 199
Ebonics, 186
Echo question, 80
Electrical communication, 247
Elements, 72
*Emergence of hierarchical grouping, 319
Emergence of language, 291
*Emergence of phonology, 318
*Emergence of recursion, 320
Emergence of word order, 319
*Emergence of writing, 291
Empirical research, 20
Empiricism, 4, 20
Empty rhyme, 112
Environmental determinism, 14, 65
Epigenesis, 14
Epigenetic, 14
Epigenetic development, 215
Epigenetic processes, 58
Episodic culture, 281
Episodic memory, 285
Epistemology, 5, 21
Errors, 132
Ethology, 246
Ethology, 58
Etymology, 295
Eugenics, 60
Eurasian language family, 307
*European starlings, 265
Evolutionary development biology, 53
Evolutionary Level, 38
*Evolutionary psychology, 298
Exemplar-based approach, 97
Exercise hypothesis, 175
External language, 94
Family Studies, 222
Feedback, 30, 155
Finger spelling, 194
First-order intentionality, 252
Fixed expression, 115
Fixed neural architecture, 51
Flexibility, 141
Forbidden experiments, 165
Foreigner speech, 177
Foreigner’s talk, 184
Foreigners’ speech, 318
Fossil record, 276
FOXP2, 226
Frame problem, 51
Free morpheme, 73
Freedom of topic, 261
Fricatives, 85
Functional categories, 76
Functional model, 36
Functional modularity, 46
Functionalism, 25
Gene, 120, 215
Genes, 333
Genetic channel, 120
Genetic determinism, 14, 65
Genetic Level, 38
Genetic localization of language, 219
Genetics, 215
Genie, 163, 167
Genome, 216
Genotype, 219
Gestuno, 196
Gesture, 185, 197
Global universals, 85
Glottochronology, 311
Grammaticalization, 99, 321
Group studies, 143
Rapidity, 141
Rationalism, 4
Rationalism, 20
Realism, 23, 104
Reanalysis, 322
Reconstruction, 302
Recursion, 77, 136
*Recursive structure, 265
Reflexive noises, 147
Regulatory genes, 69, 217
Repair rules, 75
Representational Redescription, 53
Res cognitans, 22
Res extensa, 22
Sabir, 189
Sapir-Whorf Hypothesis, 56
Savant, 229
Second language learning, 173
Second-order intentionality, 252
Selectionist nativism, 117
Semantic specification, 34, 35
Semantics, 72
Sensitive period, 165
Sensory input, 284
Sensory-based representations, 284
Sentence, 76
Sentence formation, 76
Separate breakdown, 50
Serialism, 41
Sign, 247
Sign Language, 244
*Sign languages, 190, 333
Sign systems, 196
Signed Exact English (SEE), 196
Simplex words, 73
Simplification processes, 150
Socialization, 57
Sociobiology, 63, 298
Solipsism, 23
Specific Language Elevation, 227
Specific Language Impairment (SLI), 223, 224
Speech capacity, 262
Speech specific adaptations, 333
Speed, 50
Speed of development, 333
Split-Brain Patients, 240
*Spontaneous emergence, 333, 343
Stages of development, 203
Stages of language acquisition, 141, 142
Standard Social Science Model, 20
Statistical learning, 118
Stops, 85
Structural analogy, 101
Structural Analogy, 53
Structural Analogy Assumption, 101
Structural Mismatches, 74
Structure, 261
Structure dependency, 123, 125
Subset principle, 138
Substance dualism, 23
Substrate languages, 182, 184
Suffix, 73
*Superfamilies, 307
Surface universals, 87
*Surface-wave communication, 247
Swiss army knife, 64
Syllable, 112
Symbolic, 31
Symbolic representations, 29
Symbols, 72
Synapse, 117, 218
Synaptic spaces, 24
Syntactic bootstrapping, 160
Syntax, 76
Systematicity, 133
Tabula rasa, 20
Tacit knowledge, 4
*Tactile communication, 247
Telegraphic stage, 150
Text learning, 137
Theoretic culture, 281
*Theory of mind, 252
Threshold, 145
Timed stages, 333
Tri-Level hypothesis, 33
Turing machine, 41
Twin Studies, 222
Two-word stage, 149
Uniformity of result, 141
Uniformity of stages, 141
Uniqueness Assumption, 157
Universal Grammar (UG), 6, 10
Universal Turing Machine, 41
Universality, 141
*Universals, 12, 333
Unmarked value, 111
Utterance, 93
*Vervet monkeys, 250
Virtual reality, 288
*Visual communication, 247
Vocabulary growth, 158
Vocal play, 148
Weight, 43
Wernicke’s aphasia, 243
Wernicke’s area, 235, 242
Whole Object Assumption, 157
“Wild” children, 166, 317
Williams’ Syndrome, 228
Word, 71
Word category labels, 72
Word formation, 74
Word order, 109
*Written record, 277
